multi-tasking for iPhone and iPad
Posted by sediga - 2010/04/08 16:10

I think that this is the game changer for Apple's products. Apple just announced that iPhone and iPad will support multitasking:

I agree that this will be extremely significant, perhaps mainly for the iPad which can't compete with netbooks with this restriction in place. Style can only prevail over substance for so long...

I completely agree that multitasking definitely makes it more appealing I still need to see what it can really do in terms of benchmarks before I jump on the wagon.
